# TRUXTON TRUST A PRIVATE BANK

Dear Shareholder:

Banks plan for interest rate changes, trying to make sure that our balance of loan and deposit rates and maturities will not threaten earnings or solvency in the event of sudden moves in the yield curve. Throughout our banking careers we have reviewed these numbers with consultants, considering the impact of a rapid rise of 4 percentage points in rates. The consultants always preface these remarks by saying, "Well this NEVER happens, but the regulators require us to model it..."

2022 was the year it happened. 6-month Treasury bills began 2022 yielding 0.18% and ended the year at the rate of 4.76%. Longer maturities also moved, slightly less dramatically. These changes, driven by the Federal Reserve's desperate need to snuff out inflation, had the predictable effect on housing affordability, business enthusiasm to borrow, and the value of existing bonds issued when rates were far lower. The possibility of a recession in 2023 is very real --- and that was the point. Inflation cannot be broken (by the central bank) without reducing the demand for credit through rate hikes. Mission accomplished.

These changes portend a challenging 2023 for Truxton. Our loan growth will be slower than the exceptional results for 2022; we are likely to see more borrowers struggle to make higher interest payments from assets that are less liquid and cash flows that are less robust. Our deposit cost has risen more slowly than Treasury yields have risen, but is likely to creep higher throughout 2023, perhaps faster than our yields on earning assets will rise, at least in the short term.

Enough gloom. In the rear-view mirror, things are fantastic. Truxton's earnings and asset growth in 2022 far exceeded our expectations. Diluted earnings per share grew by 15% in 2022 versus 2021 even though 1) 2021 saw \$1 million in fees from PPP loans and 2) we chose to sell some bonds at losses at the in the 4<sup>th</sup> quarter of 2022, which lowered full year EPS after tax by \$0.16. Our gross loans grew to \$619 million, 25% more than at the end of 2021, the highest percentage growth since the earliest days of Truxton. Our large bond portfolio lost value, but conservative and skillful management made our decline far smaller than most similar banks. Our return on average equity rose to 22.9%, a level that allowed us to maintain the balance sheet, pay \$2.36 per share in dividends and operate with conservative capital ratios even after adjusting for the unrealized bond losses. Truxton's wealth management business grew revenue by 8.4% in a year when the S&P 500 lost 20% in value and the bond indices lost almost as much. This happened because our portfolio managers delivered above market returns and we won many new clients attracted to our comprehensive approach and sophisticated understanding of portfolios and the families that own them.

Truxton Trust Company is a small pot of capital being wielded by some extraordinary people. The colleagues who serve our clients perform remarkable service that improves the well-being of real people who have sought our counsel. Everything we accomplish, all the value that flows to our shareholders, results from the work of dedicated people with great expertise, working as a team.

# INDEPENDENT AUDITOR'S REPORT

The Board of Directors Truxton Corporation Nashville, Tennessee

#### Opinion

We have audited the consolidated financial statements of Truxton Corporation, which comprise the consolidated balance sheets as of December 31, 2022 and 2021, and the related consolidated statements of net income, comprehensive income (loss), changes in shareholders' equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of Truxton Corporation as of December 31, 2022 and 2021, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

# **Basis for Opinion**

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Truxton Corporation and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Responsibilities of Management for the Financial Statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Truxton Corporation's ability to continue as a going concern for one year from the date the consolidated financial statements are available to be issued.

#### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Truxton Corporation's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that
  raise substantial doubt about Truxton Corporation's ability to continue as a going concern for a
  reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

# **Other Information**

Management is responsible for the other information included in the Annual Report. The other information comprises the President's Letter but does not include the consolidated financial statements and our auditor's report thereon. Our opinion on the consolidated financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the consolidated financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

#### **NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

<u>Nature of Operations and Principles of Consolidation</u>: The consolidated financial statements include Truxton Corporation and its wholly owned subsidiaries, Truxton Trust Company and Truxton Risk Management, together referred to as "the Corporation." Intercompany transactions and balances are eliminated in consolidation.

Truxton Risk Management is an insurance company regulated by the Tennessee Department of Insurance that provides protection from certain risks that are not typically covered by commercial insurance.

Truxton Trust Company, referred to as "the Bank", represents substantially all the operations in the consolidated financial statements and it provides a variety of banking, investment management and trust administration services to individuals, businesses, and charitable institutions. Its primary deposit products are demand, money market and certificates of deposit and its primary lending products are residential and commercial real estate mortgages, commercial loans, and loans to individuals.

Truxton Trust Company has two wholly owned subsidiaries, Insurgent Investments, Inc., which primarily manages an investment portfolio of municipal securities, and Truxton Capital Management, LLC, which primarily provides investment management and advisory services to businesses and their owners.

<u>Subsequent Events</u>: The Corporation has evaluated subsequent events for recognition and disclosure through January 25, 2023, which is the date the financial statements were available to be issued.

<u>Use of Estimates</u>: To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and the disclosures provided and actual results could differ.

<u>Cash Flows</u>: Cash and cash equivalents include cash, deposits with other financial institutions with maturities under 90 days, and federal funds sold. Net cash flows are reported for customer loan and deposit transactions, premises and equipment, and time deposits in other financial institutions.

<u>Time Deposits in Other Financial Institutions</u>: Time deposits in other financial institutions are carried at cost. These accounts are maintained at several financial institutions not all are within the insurance limits provided by the Federal Deposit Insurance Corporation "FDIC" and have maturities ranging from 2023 to 2027.

<u>Securities</u>: Debt securities are classified as available for sale when they might be sold before maturity. Securities available for sale are carried at fair value with unrealized holding gains and losses reported in accumulated other comprehensive income (loss), net of tax.

Interest income includes net amortization of purchase premium or discount. Premiums and discounts on securities are amortized on the level-yield method. Gains and losses on sales are recorded on the trade date and determined using the specific identification method.

Management evaluates securities for other-than-temporary impairment "OTTI" on at least a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. For securities in an unrealized loss position, management considers the extent and duration of the unrealized loss, and the financial condition and near-term prospects of the issuer. Management also assesses whether it intends to sell, or it is more likely than not that it will be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the entire difference between amortized cost and fair value is recognized as impairment through earnings. For debt securities that do not meet the aforementioned criteria, the amount of impairment is split into two components as follows: 1) OTTI related to credit loss, which must be recognized in the income statement, and 2) OTTI related to other factors, which is recognized in other comprehensive income (loss). The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis.

#### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

<u>Loans Held for Sale</u>: Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or fair value, as determined by outstanding commitments from investors. Net unrealized losses, if any, are recorded as a valuation allowance and charged to earnings.

The carrying value of mortgage loans sold is reduced by the amount allocated to the servicing right, if servicing is retained. As of December 31, 2022, the Company has not sold any loans with servicing retained. Gains and losses on sales of mortgage loans are based on the difference between the selling price and the carrying value of the related loan sold.

<u>Loans</u>: Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of deferred loan fees and costs. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income using the level-yield method without anticipating prepayments.

Interest income is reported on the interest method and includes amortization of net deferred loan fees and costs over the loan term. Interest income on all loans is discontinued at the time the loan is 90 days delinquent unless the credit is well-secured and in process of collection. Past due status is based on the contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful. Nonaccrual loans and loans past due 90 days still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

All interest accrued, but not received, for loans placed on nonaccrual are reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost-recovery method until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

<u>Concentration of Credit Risk</u>: Most of the Corporation's business activity is with customers located within Nashville, Tennessee. Therefore, the Corporation's exposure to credit risk is significantly affected by changes in the economy in the Nashville, Tennessee metropolitan area.

<u>Allowance for Loan Losses</u>: The allowance for loan losses is a valuation allowance for probable incurred credit losses, increased by the provision for loan losses and decreased by charge-offs less recoveries. Management estimates the allowance balance required using historical loan loss experience of both the bank and the banking industry, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries if any, are credited to the allowance.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired. The general component covers loans that are collectively evaluated for impairment and is based on historical loss experience adjusted for current factors.

A loan is impaired when, based on current information and events, it is probable that the Corporation will be unable to collect all amounts due according to the contractual terms of the loan agreement. Loans, for which the terms have been modified resulting in a concession, and for which the borrower is experiencing financial difficulties, are considered troubled debt restructurings, and classified as impaired.

Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including

# NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Commercial and commercial real estate loans are individually evaluated for impairment. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Large groups of smaller balance homogeneous loans, such as consumer and residential real estate loans are collectively evaluated for impairment and accordingly, they are not separately identified for impairment disclosures.

Troubled debt restructurings are individually evaluated for impairment and included in the separately identified impairment disclosures. Troubled debt restructurings are measured at the present value of estimated future cash flows using the loan's effective rate at inception. If a troubled debt restructuring is considered to be a collateral dependent loan, the loan is reported, net, at the fair value of the collateral. For troubled debt restructurings that subsequently default, the Corporation determines the amount of the allowance on the loan in accordance with the accounting policy for the allowance for loan losses individually evaluated as impaired.

The historical loss experience used in management's analysis of the general component for the allowance for loan losses is determined by portfolio segment and is based on the average loss history experienced by the bank and banking industry over the most recent 12 years. Management determined that periods shorter than 12 years were inadequate given the paucity of material, differentiating loss data. The Corporation used the loss history of its peers, as it has experienced very few losses on its own during the entire history of the Corporation. Management evaluates 12 years of peer losses in order to align with what management expects normalized probable incurred losses to be for the Corporation. This actual loss experience is supplemented with other economic factors based on the risks present for each portfolio segment. These economic factors include consideration of the following: levels of and trends in delinquencies and impaired loans; levels of and trends in charge-offs and recoveries; trends in volume and terms of loans; effects of any changes in risk selection and underwriting standards; other changes in lending policies, procedures, and practices; experience, ability, and depth of lending management and other relevant staff; national and local economic trends and conditions; industry conditions; and effects of changes in credit concentrations.

The following portfolio segments have been identified:

- Commercial loans include loans for commercial, industrial, or agricultural purposes to business
  enterprises that are not secured by real estate. These loans are typically made on the basis of the
  borrower's ability to repay from the cash flow of the borrower's business and are generally secured by
  accounts receivable, inventory and equipment. The collateral securing loans may depreciate over
  time, may be difficult to appraise and may fluctuate in value based on the success of the business.
- Commercial Real Estate loans include loans secured by non-residential real estate and improvements thereon. Often these loans are made to single borrowers or groups of related borrowers, and the repayment of these loans largely depends on the results of operations and management of these properties. Adverse economic conditions may affect the repayment ability of these loans.
- Residential Real Estate loans include loans secured by residential real estate, including single-family and multi-family dwellings. Adverse economic conditions in the Corporation's market area may reduce borrowers' ability to repay these loans and may reduce the collateral securing these loans.

#### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

- Construction and Land Development loans include loans to finance the process of improving properties preparatory to erecting new structures or the on-site construction of industrial, commercial, residential or farm buildings. Construction and land development loans also include loans secured by vacant land, except land known to be used or usable for agricultural purposes. Construction loans generally are made for relatively short terms. They generally are more vulnerable to changes in economic conditions. Furthermore, the nature of these loans is such that they are more difficult to evaluate and monitor. The risk of loss on a construction loan is dependent largely upon the accuracy of the initial estimate of the property's value upon completion of the project and the estimated cost (including interest) of the project. Periodic site inspections are made on construction loans.
- Consumer loans include loans to individuals for household, family and other personal expenditures that are not secured by real estate.

<u>Bank Owned Life Insurance</u>: The Bank has purchased life insurance policies on certain key employees. Bank owned life insurance is recorded at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or other amounts due that are probable at settlement.

<u>Transfers of Financial Assets</u>: Transfers of financial assets are accounted for as sales, when control over the assets has been relinquished. Control over transferred assets is deemed to be surrendered when the assets have been isolated from the Corporation, the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and the Corporation does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

<u>Premises and Equipment</u>: Premises and equipment are stated at cost less accumulated depreciation. Leasehold improvements are amortized using the straight-line method over the shorter of the lease terms or the useful lives. Furniture, fixtures and equipment are depreciated using the straight-line method with useful lives ranging from three to five years.

<u>Restricted Equity Securities</u>: The Bank is a member of the Federal Home Loan Bank (FHLB) and Federal Reserve Bank (FRB) systems. Members are required to own a certain amount of stock based on the level of borrowings and on their level of equity and may invest in additional amounts. FHLB and FRB stock are carried at cost, classified as restricted equity securities and periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends are reported as income.

<u>Prepaid Long-term Compensation</u>: The Corporation paid retention bonuses in cash to certain key employees. These cash bonuses are considered long-term compensation to be earned over a 24 to 120-month requisite service period. The amount of the contracts is earned pro rata by the employees and expensed pro rata by the Corporation over the contractual term of the agreements. In the event that the employee leaves during the life of the contract, the employee is obligated to repay the unearned amount. Prepaid long-term compensation amounts of \$673 and \$504 were included in other assets as of December 31, 2022 and 2021.

### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

<u>Long-term Assets</u>: Premises and equipment and other long-term assets are reviewed for impairment when events indicate their carrying amount may not be recoverable from future undiscounted cash flows. If impaired, the assets are recorded at fair value.

<u>Assets Under Management</u>: Assets held in fiduciary or agency capacities are not included in the consolidated balance sheets since such items are not assets of the Corporation.

<u>Wealth Management Services Income Recognition</u>: Income from Wealth Management Services is calculated by multiplying each investment management account's market value, determined on a specific date each month, by a static or tiered percentage, according to the investment management agreement. The income resulting from Wealth Management Services accounts is recognized monthly.

<u>Derivatives</u>: The Corporation has entered into derivative contracts designated as a) a hedge of fair value of a recognized asset or liability or of an unrecognized firm commitment ("fair value hedge"), and b) a hedge of the variability of cash flows to be received or paid related to a recognized asset or liability ("cash flow hedge"). For a fair value hedge, the gain or loss on the derivative, as well as the offsetting loss or gain on the hedged item, are recognized in current earning as fair values change. For a cash flow hedge, the gain or loss on the derivative income and is reclassified into earnings in the same periods during which the hedged transaction effects earnings. For both types of hedges, changes in the fair values of derivatives that are not highly effective in hedging the changes in fair value or expected cash flows of the hedged item are recognized immediately in current earnings. Net cash settlements on derivatives that qualify for hedge accounting are recorded in interest income or interest expense, based on the item being hedged. Cash flows on hedges are classified in the cash flow statement the same as the cash flows of the items being hedged.

The Corporation formally documents the relationship between derivatives and hedged items, as well as the risk-management objective and the strategy for undertaking hedge transactions at the inception of the hedging relationship. This documentation includes linking hedges to specific assets and liabilities on the balance sheet. The Corporation also formally assesses, both at the hedges inception and on an ongoing basis, whether the derivative instruments that are used are highly effective in offsetting changes in fair values or expected cash flows of hedged items. The Corporation discontinues hedge accounting when it determines that the derivative is no longer effective in offsetting changes in fair value of the hedged item, the derivative is settled or terminates, or the treatment of the derivative as a hedge is no longer appropriate or intended. When hedge accounting is discontinued, subsequent changes in fair value of the derivative are recorded as non-interest income.

The Corporation is exposed to losses if a counterparty fails to make its payments under a contract in which the Corporation is in the net receiving position. The Corporation anticipates that the counterparties will be able to fully satisfy their obligations under the agreements. All the contracts to which the Corporation is a party settle monthly or quarterly. In addition, the Corporation obtains collateral above certain thresholds of the fair value of its derivatives for each counterparty based upon their credit standing and the Corporation has netting agreements with the dealers with which it does business.

<u>Stock-Based Compensation</u>: Compensation cost is recognized for stock options and restricted stock awards issued to employees and directors, based on the fair value of these awards at the date of grant. A Black-Scholes model is utilized to estimate the fair value of stock options, while the market price of the Corporation's common stock at the date of grant is used for restricted stock awards. Compensation cost is recognized, on a straight-line basis over the requisite service period for the entire award generally defined as the vesting period.

<u>Retirement Plans</u>: Employee 401(k) benefit plan expense is the amount of matching contributions for the period.

### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

<u>Comprehensive Income</u>: Comprehensive income consists of net income and other comprehensive income. Other comprehensive income includes unrealized gains and losses on securities available for sale and unrealized gains and losses on cash flow hedges, which are also recognized as separate components of shareholders' equity.

<u>Income Taxes</u>: Income tax expense or benefit is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded.

The Corporation recognizes interest and/or penalties related to income tax matters in income tax expense.

<u>Earnings Per Share</u>: Basic earnings per share available to common shareholders is computed by dividing net income adjusted for income allocated to participating securities by the weighted average number of common shares outstanding during the period. All outstanding unvested share-based payment awards that contain rights to non-forfeitable dividends are considered participating securities for this calculation. Diluted earnings per share include the dilutive effect of additional potential common shares issuable under stock options.

<u>Loss Contingencies</u>: Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. Management does not believe that there now are such matters that will have a material effect on the financial statements.

<u>Restrictions on Cash</u>: Cash on hand or on deposit with the Federal Reserve Bank is required to meet regulatory reserve and clearing requirements.

<u>Dividend Restriction</u>: Banking regulations require maintaining certain capital levels and may limit the dividends paid by the Bank to the Corporation or by the Corporation to shareholders.

<u>Fair Value of Financial Instruments</u>: Fair values of financial instruments are estimated using relevant market information and other assumptions as more fully disclosed in a separate note. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates.

<u>Off Balance Sheet Financial Instruments</u>: Financial instruments include off-balance sheet credit instruments, such as commitments to make loans and standby letters of credit issued to meet customer financing needs. The face amount for these items represents the exposure to loss before considering customer collateral or ability to repay. Such financial instruments are recorded as loans when funded.

<u>Reclassifications</u>: Some items in the prior year financial statements were reclassified to conform to the current presentation. Reclassifications had no effect on prior year net income or shareholders' equity.

#### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Newly Issued, Not Yet Effective Accounting Standards:

#### ASU 2016-13, Financial Instruments – Credit Losses (Topic 326)

In June 2016, FASB issued guidance to replace the incurred loss model with an expected loss model, which is referred to as the current expected credit loss (CECL) model. The CECL model is applicable to the measurement of credit losses on financial assets measured at amortized cost, including loan receivables, held-to maturity debt securities, and reinsurance receivables. It also applies to off-balance sheet credit exposures not accounted for as insurance (loan commitments, standby letters of credit, financial guarantees, and other similar instruments) and net investments in leases recognized by a lessor.

Transition:

- For debt securities with other-than-temporary impairment (OTTI), the guidance will be applied prospectively.
- Existing purchased credit impaired (PCI) assets will be grandfathered and classified as purchased credit deteriorated (PCD) assets at the date of adoption. The asset will be grossed up for the allowance for expected credit losses for all PCD assets at the date of adoption and will continue to recognize the noncredit discount in interest income based on the yield of such assets as of the adoption date. Subsequent changes in expected credit losses will be recorded through the allowance.
- For all other assets within the scope of CECL, a cumulative-effect adjustment will be recognized in retained earnings as of the beginning of the first reporting period in which the guidance is effective.

The standard will be effective for fiscal years beginning after December 15, 2022.

The Corporation is currently evaluating the impact of this new accounting standard on the consolidated financial statements.

Sales of available for sale securities were as follows for the years ending December 31, 2022 and 2021:

	<u>2022</u>	<u>2021</u>
Proceeds Gross gains Gross losses	\$ 27,965 9 (645)	\$ - -

Securities pledged at year-end 2022 and 2021 had a carrying value of \$31,863 and \$40,313 and were pledged to secure public deposits, interest rate swaps, and one of the bank's federal funds lines of credit. The Corporation had no holdings of securities of any one issuer, other than the U.S. government sponsored entities and agencies, in an amount greater than 10% of shareholders' equity.

The amortized cost and fair value of the investment securities portfolio are shown by contractual maturity. Expected maturities may differ from contractual maturities if borrowers have the right to call or prepay obligations with or without call or prepayment penalties. Securities not due at a single maturity date are shown separately.

Unrealized losses on securities have not been recognized into income because the issuers are of high credit quality, management does not intend to sell and it is more likely than not that management will not be required to sell the securities prior to their anticipated recovery, and the decline in fair value is largely due to changes in market interest rates instead of credit quality. The fair value is expected to recover as the securities approach their maturity dates and/or market rates change. As a result, the Corporation does not consider these securities to be other-than-temporarily impaired at December 31, 2022.

#### **NOTE 3 - LOANS** (Continued)

As of December 31, 2022, and 2021, the Corporation has a recorded investment in troubled debt restructurings of \$305 and \$6,074. The Corporation has allocated no specific reserves for those loans at December 31, 2022 and 2021.

The modifications in terms associated with troubled debt restructurings that occurred in 2021 included the reduction of near-term interest and/or principal payments as a concession to borrowers experiencing financial stress. These loans are well secured by residential or commercial real estate.

The troubled debt restructurings described above had no impact on the allowance for loan losses or charge offs during the year ending December 31, 2022.

There were no loans by class modified as troubled debt restructuring that occurred during the year ending December 31, 2022. The following table presents loans by class modified as troubled debt restructuring that occurred during the year ending December 31, 2021:

December 31, 2021	Number Of <u>Loans</u>	Out Re	Iodification standing ecorded <u>estment</u>	Out Re	Modification tstanding ecorded restment
Troubled debt restructurings: Commercial real estate	2	\$	5,767	\$	5,767
Residential real estate: Closed-end	1	\$	196	\$	196

There were no loans that were modified as troubled debt restructurings for which there was a payment default within twelve months following the modification during the years ended December 31, 2022 and 2021.

For purposes of this disclosure, the unpaid principal balance is not reduced for partial charge-offs.

# **NOTE 3 - LOANS** (Continued)

There were no loans past due over 90 days and still accruing as of December 31, 2022, and 2021, respectively.

There were no loans on non-accrual as of December 31, 2022, and 2021, respectively.

The following table presents the aging of the recorded investment in past due loans as of December 31, 2022, and 2021 by class of loans:

December 31, 2022	30 - 59 Days <u>Past Due</u>	60 - 89 Days <u>Past Due</u>	Greater than 89 Days <u>Past Due</u>	n Total <u>Past Due</u>	Loans Not <u>Past Due</u>	<u>Total</u>

NOTE 3 - LOANS (Continued)

#### Credit Quality Indicators:

The Corporation categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Corporation periodically analyzes loans individually by classifying the loans as to credit risk. The Corporation uses the following definitions for risk ratings:

**Special Mention.** Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

**Substandard.** Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

**Doubtful.** Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be pass rated loans. As of December 31, 2022, and 2021, based on the most recent analysis performed, the risk category of loans by class of loans is as follows:

December 21, 2022		Pass		pecial ention	<u>Subst</u>	andard	Dou	<u>ubtful</u>
December 31, 2022 Commercial Commercial real estate Residential real estate:	\$	53,018 236,767	\$	- 5,788	\$	-	\$	-
Closed-end Open-end Construction and land development:		185,871 42,929 45,648		-		14 - -		-
Consumer		49,791		<u> </u>				
Total	<u>\$</u>	614,024	<u>\$</u>	<u>5,788</u>	<u>\$</u>	14	<u>\$</u>	
December 31, 2021 Commercial Commercial real estate Residential real estate:	\$	38,549 191,280	\$	- 5,767	\$	-	\$	-
Closed-end Open-end Construction and land development: Consumer		160,028 32,780 39,999 26,870		196 - -		11 - -		- - -
Total	<u>\$</u>	489,506	<u>\$</u>	<u>5,963</u>	<u>\$</u>	<u>11</u>	<u>\$</u>	<u> </u>

#### **NOTE 4 - PREMISES AND EQUIPMENT**

Year-end premises and equipment were as follows:

		<u>2022</u>	<u>2021</u>
Leasehold improvements	\$	1,366	\$ 1,366
Furniture, fixtures and equipment		926	905
Computer software		1,054	 991
		3,346	3,262
Less: Accumulated depreciation and amortization		<u>(3,137</u> )	 <u>(2,946</u> )
Net premises and equipment	<u>\$</u>	209	\$ 316

Depreciation and amortization expense totaled \$191 and \$239 for 2022 and 2021, respectively.

#### NOTE 5 - LEASES

The Corporation enters into leases in the normal course of business primarily for the Corporation's office space. The Corporation's main office facility is subject to a five-year lease, terminating June 1, 2023. The Corporation's leases have remaining terms ranging from 5 months to 17 months, some of which include renewal options to extend the lease for up to 2 years. The Corporation's leases do not include residual value guarantees or covenants.

The Corporation has elected to account for any non-lease components in its real estate leases as part of the associated lease component. The Corporation has also elected not to recognize leases with original lease terms of 12 months or less (short-term leases) on the Corporation's balance sheet.

The Corporation's leases are classified as operating leases at the lease commencement date. Lease expense for operating leases is recognized on a straight-time basis over the lease term. Right-of-use assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Right-of-use assets and lease liabilities are recognized at the lease commencement date based on the estimated present value of lease payments over the lease term.

The Corporation uses its incremental borrowing rate at lease commencement to calculate the present value of lease payments when the rate implicit in a lease is not known. The Corporation's incremental borrowing rate is based on FHLB amortizing advance rate, adjusted for the lease term and other factors.

Right-of-use assets and lease liabilities by lease type, and associated balance sheet classification, are as follows:

Balance Sheet Classification Right-of-use assets:		<u>2022</u>	<u>2021</u>
Operating leases	Other assets	\$ 235	\$ 681
Lease liabilities: Operating leases	Other liabilities	\$ 235	\$ 681

(Dollars in thousands except share and per share amounts)

#### **NOTE 5 - LEASES** (Continued)

#### Lease Obligations

Future undiscounted lease payments for operating leases with initial terms of one year or more as of December 31, 2022 are as follows:

		Operating <u>Leases</u>
2023 2024 Total undiscounted lease payments Less: imputed interest Net lease liabilities		$ \begin{array}{ccc} \$ & 227 \\ & 11 \\ & 238 \\ \hline & 3 \\ \$ & 235 \\ \end{array} $
Supplemental lease Information		
	<u>2022</u>	<u>2021</u>
Operating lease weighted average remaining lease term (years) Operating lease weighted average discount rate	0.50 2.88%	1.4 2.77%

#### **NOTE 6 - DEPOSITS**

Scheduled maturities of time deposits, included in interest bearing deposits, for the next five years were as follows:

2023	\$ 83,520
2024	2,702
2025	8,697
2026	9,266
2027	4,123

Time deposits that meet or exceed the FDIC Insurance limit of \$250 at December 31, 2022 and 2021 were \$94,722 and \$15,663.

#### NOTE 7 - BORROWINGS

Borrowings include Federal Home Loan Bank advances and subordinated debt.

#### Federal Home Loan Bank Advances

At December 31, 2022 and 2021, advances from the FHLB were as follows:

For 2022 and 2021, interest rates ranged from 1.02% to2.90%, averaging 2.01% with maturities betweenJanuary 24, 2024 and April 28, 2025.\$ 4,500

The advances are subject to penalties if repaid before scheduled payments are due. The Bank's outstanding borrowings from the FHLB are secured by a blanket pledge agreement of 150% of 1-4 family loans, first lien mortgage loans. The Bank has approximately \$99,367 of 1-4 family, first mortgage loans and \$26,284 of home equity mortgage loans available to pledge under the blanket pledge arrangement dated March 16, 2006. Based on the collateral and the Corporation's holdings of FHLB Stock, the Bank is eligible to borrow additional advances of approximately \$97,400 as of December 31, 2022.

Payments over the next five years are as follows:

2024	\$ 2,250
2025	2,250

#### Subordinated Debt

In 2020, the Corporation issued \$15,000 of ten year fixed-to-floating rate subordinated notes maturing September 30, 2030. This subordinated note instrument pays interest semi-annually in arrears based on a 4.5% fixed annual interest rate for the first five years of the notes. For years six through ten, the interest rate resets on a quarterly basis, and will be based on the 3-month Secured Overnight Financing Rate plus a spread of 438 basis points. The Company is entitled to redeem the notes in whole or in part on any interest payment date on or after September 30, 2025.

The Company has recorded the issuance, net of unamortized issuance costs of \$273 and \$372 as of December 31, 2022, and 2021, respectively.

# **NOTE 8 - INCOME TAXES**

Income tax expense was as follows:

	<u>2022</u>	<u>2021</u>

Total deferred tax liabilities		<u>(2,042</u> )	 <u>(1,651</u> )
Deferred tax asset, net	\$	7,161	\$ 62

The Corporation does not have any uncertain tax positions and has minimal interest and penalties recorded or accrued in the consolidated financial statements for the years ended December 31, 2022, and 2021. The Corporation and its subsidiaries are subject to U.S. federal income tax as well as income tax of the states of Georgia and Tennessee. The Corporation is no longer subject to examination by taxing authorities for years before 2018.

#### **NOTE 9 - RELATED PARTY TRANSACTIONS**

Loans to principal officers, directors and their affiliates at December 31, 2022 and 2021 totaled \$7,554 and \$10,241, respectively.

Deposits from principal officers, directors and their affiliates at December 31, 2022 and 2021 totaled \$4,197 and \$3,123, respectively.

Wealth management fees earned from assets under management for principal officers, directors and their affiliates at December 31, 2022 and 2021 totaled \$1,057 and \$1,011, respectively.

The Company recognized \$4 from an unconsolidated related entity during the year ended December 31, 2022.

Additionally, the Corporation has a director that is a member of the firm from which it receives legal services.

# NOTE 10 - REGULATORY CAPITAL MATTERS

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet capital requirements can initiate regulatory action. The net unrealized gain or loss on available for sale securities is included in computing regulatory capital. Management believes as of December 31, 2022, the Bank meets all capital adequacy requirements to which it is subject.

Prompt corrective action regulations provide five classifications: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and capital restoration plans are required. At December 31, 2022 and 2021, the most recent regulatory notifications categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that management believes have changed the institution's category.

Actual and required capital amounts and ratios for the Bank are presented below as of December 31, 2022 and 2021. The capital conservation buffer is not included in the required ratios of the table presented below.

					To Be Capitalize	
	<u>Ac</u>	<u>tual</u>	For C Adequacy	Purposes	Prompt C Action Pr	orrective
<u>2022</u> Total Capital to risk	<u>Amount</u>	<u>Ratio</u>	<u>Amount</u>	<u>Ratio</u>	<u>Amount</u>	<u>Ratio</u>
weighted assets Tier 1 (Core) Capital to	\$ 97,519	14.20%	\$ 54,938	8.00%	\$ 68,672	10.00%
risk weighted assets	91,758	13.36%	41,203	6.00%	54,938	8.00%
Common Tier 1 (CET1)	91,758	13.36%	30,902	4.50%	44,637	6.50%

risk weighted assets Common Tier 1 (CET1)	78,060 78,060	13.82% 13.82%	33,896 25,422	6.00% 4.50%	45,195 36,721	8.00% 6.50%
Tier 1 (Core) Capital to average assets	78,060	8.95%	34,870	4.00%	43,588	5.00%

**Dividend Restrictions** - The Corporation's principal source of funds for dividend payments is dividends received from the Bank. Banking regulations limit the amount of dividends that may be paid without prior approval of regulatory agencies. Under these regulations, the amount of dividends that may be paid in any calendar year is limited to the current year's net profits, combined with the retained net profits of the preceding two years, subject to the capital requirements described above. During 2023, the Bank could, without prior approval, declare dividends of approximately \$17,294 plus any 2022 net profits retained to date of declaration.

#### NOTE 11 - OFF-BALANCE SHEET ACTIVITIES

Some financial instruments, such as loan commitments, credit lines, and letters of credit, are issued to meet customer financing needs. These are agreements to provide credit or to support the credit of others as long as conditions established in the contract are met. In addition, these agreements usually have expiration dates, and the commitments may expire without being used.

Off-balance sheet risk to credit loss exists up to the face amount of these instruments, although material losses are not anticipated. The same credit policies are used to make such commitments as are used for loans, including obtaining collateral at the exercise of the commitment. The majority of the Corporation's commitments to extend credit have maturities of less than one year and reflect the prevailing market interest rates at the time of the commitment.

The contractual amount of financial instruments with off-balance sheet risk was as follows at December 31:

	2022			2021
Letters of Credit Unused Lines of Credit	\$	3,311 162,631	\$	3,690 141,399

# NOTE 12 - STOCK BASED COMPENSATION PLAN

Total stock-based compensation expense in 2022 and 2021 was \$1,376 and \$966, respectively. Related to the 2022 and 2021 restricted stock grants, some employees made an election, in accordance with Section 83(b) of the Internal Revenue Code, to have the fair value of the awards taxable immediately. In connection with the election, the Corporation allowed the employees to forfeit shares to cover the related personal tax obligation. During 2022 employees forfeited 553 shares with a total fair value of \$41. During 2021 employees forfeited 1,011 shares with a total fair value of \$47. These amounts were recorded in salaries and employee benefits on the Corporation's consolidated statements of income in 2022 and 2021.

The Corporation's 2008 Equity Incentive Plan as modified in 2015 provides for the grant of stock options, restricted stock and other equity-based incentives up to 900,000 shares. As of December 31, 2022, the Corporation had issued grants totaling 866,249 shares under the 2008 Equity Incentive Plan and its predecessor, the 2004 Employee Share Option Plan. The Corporation's 2021 Equity Incentive Plan, approved by shareholders on May 19, 2021, provides for the grant of stock options, restricted stock, and other equity-based incentives of 233,751 shares. This includes 200,000 shares newly authorized shares under the 2021 Equity Incentive Plan and 33,751 shares previously available under the 2008 Equity Incentive Plan. As of December 31, 2022, the Corporation has issued 39,873 of these shares under the 2021 Equity Incentive Plan.

#### Stock Option Grants

Option awards are granted with an exercise price equal to the market price of the Corporation's common stock at the date of grant. Option awards have vesting periods of one to six years and have 10-year contractual terms. The Corporation uses newly issued shares to satisfy share option exercises.

The fair value of each option award is estimated on the date of grant using a closed form option valuation (Black-Scholes) model that uses the assumptions noted in the table below. Expected volatilities are based on historical trading of the shares of Truxton Corporation common stock for 2022 and 2021. The expected term of options granted is based on historical data and represents the period of time that options granted are expected to be outstanding taking into account that the options are not transferable.

#### NOTE 12 - STOCK BASED COMPENSATION PLAN (Continued)

The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant.

During 2022 and 2021, the Corporation issued incentive stock options for the purchase of 0 shares and 5,000 shares of common stock, respectively. The fair value of options granted in 2022 and 2021 was determined using the following assumptions as of grant date:

	<u>2022</u>	<u>2021</u>
Risk-free interest rate Expected term Expected stock price volatility Dividend yield		1.20% 6.75 years 38.69% 2.15%

A summary of the stock option activity for 2022 follows:

, , , , , , , , , , , , , , , , , , ,	<u>Shares</u>	Weighted Average Exercise <u>Price</u>	Weighted Average Remaining Contractual <u>Term</u>	Īr	gregate htrinsic <u>Value</u>
Outstanding at beginning of year Forfeited Exercised	33,488 (7,500) <u>(3,523</u> )	\$ 34.06 37.00 40.74	6.0		
Outstanding at end of year	22,465	32.02	4.1	\$	721
Vested or expected to vest	22,465	32.02	4.1		721
Exercisable at end of year	19,388	28.85	3.9		683

Information related to stock options during each year follows:

	<u>2022</u>			<u>2021</u>		
Intrinsic value of options exercised Cash received from option exercises	\$	82 144	\$	676 273		
Weighted average fair value of options granted		-		20.94		

There was a total of \$47 in unrecognized compensation cost related to non-vested stock options granted under the Plan as of December 31, 2022. The cost is expected to be recognized over a weighted-average period of 0.1 years.

#### NOTE 12 - STOCK BASED COMPENSATION PLAN (Continued)

#### Restricted Stock Grants

In 2022 and 2021, the Corporation issued 39,873 and 20,569 restricted shares of common stock, respectively. Compensation expense is recognized over the vesting period of the awards based on the value of the stock at issue date. The fair value of the stock was determined by current stock trade activity. These shares vest over a period of five to seven years.

A summary of the changes in the Corporation's non-vested shares for the year follows:

Non-vested shares	<u>Shares</u>	Weighted- Average <u>Fair Value</u>
Non-vested at January 1, 2022 Granted Vested Forfeited or expired	62,880 39,873 (21,195) <u>(2,228</u> )	\$ 41.65 71.53 39.97 <u>50.21</u>
Non-vested at December 31, 2022	<u> </u>	<u>\$ 56.85</u>

As of December 31, 2022, there was \$3,494 of total unrecognized compensation cost related to non-vested restricted shares granted under the Plan. The cost is expected to be recognized over a weighted-average period of 2.7 years.

#### NOTE 13 - DERIVATIVES

The Corporation utilizes interest rate swap agreements as part of its asset liability management strategy to help manage its interest rate risk position. The notional amount of the interest rate swaps does not represent amounts exchanged by the parties. The amount exchanged is determined by reference to the notional amount and the other terms of the individual interest rate swap agreements.

#### Fair Value Hedge

The Corporation has entered into swaps designated as Fair Value Hedges for Loans and Securities, totaling \$22,634 and \$10,750 in notional, respectively, as of December 31, 2022. In February 2020, the Corporation hedged the fair value of six municipal bond holdings with swaps, through which the Corporation pays fixed rates matching the bonds' coupons and receives 3-month USD LIBOR plus a spread until the bonds' first call dates. Prior to 2021, the Corporation had hedged four loans with swaps matching the notional, amortization schedule, and maturity of those loans. With these swaps, the Corporation pays the swap counterparty a fixed rate equal to the loan interest and receives 1-month USD LIBOR plus a spread. The loan customers are not party to the swaps, but their loans have prepayment penalties that would equal the cost to unwind the swaps, if necessary. In 2021, the Corporation entered two more similar swaps to hedge 10-year loans, receiving a floating rate based on 1-month LIBOR for one and an average rate based on the Secured Overnight Financing Rate (SOFR) for the other.

The following table reflects the fair value hedges included in the Consolidated Statements of Net Income as of December 31:

Interest rate contracts	Location	<u>2022</u>		<u>2021</u>	
Change in fair value on interest rate swaps hedging loans and securities	Loan interest income	\$	(14)	\$	(12)

(Dollars in thousands except share and per share amounts)

#### NOTE 13 - DERIVATIVES (Continued)

The following table reflects the fair value hedges included in the Consolidated Balance Sheets as of December 31:

	20	)22	2021		
	Notional Amount	Fair Value	Notional Amount	Fair Value	
Included in other assets: Derivatives designated as hedges: Interest rate swaps	\$ 33,384	\$ 3,289	\$ 34,067	\$ 1,036	
Included in other liabilities: Derivatives designated as hedges: Interest rate swaps	\$ 33,384	\$ 3,048	\$ 34,067	\$ 781	

#### Cash Flow Hedge

Interest Rate Swaps Designated as Cash Flow Hedges: Interest rate swaps with notional amounts totaling \$47,500 as of December 31, 2022, and \$30,000 as of December 31, 2021, were designated as cash flow hedges of certain deposit accounts and were determined to be fully effective during the periods presented. In July 2022, the Corporation entered into two new cashflow hedges, a \$7,500 forward starting swap that will become effective on the maturity date of an existing \$7,500 hedge, essentially extending its maturity, and a \$10,000 swap that was effective immediately. For \$32,500 notional of the cash flow hedges, the Corporation pays a fixed rate and receives a monthly average of the Effective Federal Funds rate, to which the hedged deposits' rates are indexed. For the other \$15,000 notional, the Corporation pays a fixed rate and receives 3-month USD LIBOR, which is highly correlated to the cost of the 3-month wholesale borrowings (such as FHLB advances or brokered CDs) being hedged. As such, no amount of ineffectiveness has been included in net income. Therefore, the aggregate fair value of swaps is recorded in other liabilities with changes in fair value recorded in other comprehensive income (loss). The Company expects the hedges to remain fully effective during the remaining terms of the swaps.

The following table presents the net losses recorded in accumulated other comprehensive income and the Consolidated Statements of Net Income relating to the cash flow derivative instruments for the year ended December 31:

			20	022:		
	Amou	Amount of Gain Amount of Gain				nt of Gain

#### **NOTE 13 - DERIVATIVES** (Continued)

The following table reflects the fair value hedges included in the Consolidated Balance Sheets as of December 31:

	20	)22	2021		
	Notional	Fair	Notional	Fair	
Included in other assets:	Amount	Value	Amount	Value	Э
Interest rate swaps related to deposits	\$ 47,500	\$ 4,147	\$ 30,000	\$	62

# NOTE 14 - FAIR VALUES OF FINANCIAL INSTRUMENTS

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair values:

Level 1 – Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2 – Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Significant unobservable inputs that reflect a Corporation's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Corporation used the following methods and significant assumptions to estimate the fair value of each type of financial instrument:

Investment Securities: The fair values for investment securities are determined by quoted market prices, if available "Level 1". For securities where quoted prices are not available, fair values are calculated using a matrix pricing model, which is based on market prices of similar securities "Level 2". Matrix pricing is a mathematical technique commonly used to price debt securities that are not actively traded, which values debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark securities.

<u>Derivatives</u>: The fair value of the derivatives is based on valuation models using observable market data as of the measurement date (Level 2). Our derivatives are traded in an over-the-counter market where quoted market prices are not always available. Therefore, the fair values of derivatives are determined using quantitative models that utilize multiple market inputs. The inputs will vary based on the type of derivative, prepayment rates, and volatility factors to value the position. The majority of the market inputs is actively quoted and can be validated through external sources, including brokers, market transactions and third-party pricing services.

# NOTE 14 - FAIR VALUES OF FINANCIAL INSTRUMENTS (Continued)

Assets and liabilities measured at fair value on a recurring basis are summarized below:

	Fair Value Measurements at Using:

Loans, net		490,024		-		-	489,357		489,357
Accrued interest receivable		2,346		-		1,148	1,198		2,346
Financial liabilities									
Deposits	\$	807,475	\$	-	\$	806,902	\$ -	\$	806,902
Federal Home Loan Bank advances		4,500		-		4,551	-		4,551
Accrued interest payable		14		14		-	-		14

The methods and assumptions, not previously presented, used to estimate fair values are described as follows:

The carrying amount of cash and cash equivalents approximates fair values and are classified as Level 1. Time deposits in other financial institutions have infrequent repricing or repricing limits and their fair value is based on discounted cash flows using current market rates applied to the estimated life and are classified as Level 2. It is not practical to determine the fair value of restricted equity securities due to the restrictions placed on its transferability.

The fair value of loans is determined based on a discounted cash flow analysis (income approach.) The discounted cash flow was based on contractual maturity of the loan and current market assumptions resulting in a level 3 classification. Impaired loans are valued at the lower of cost or fair value as described previously.

(Dollars in thousands except share and per share amounts)

#### NOTE 14 - FAIR VALUES OF FINANCIAL INSTRUMENTS (Continued)

The fair values disclosed for demand deposits are by definition, equal to the amount payable on demand at the reporting date resulting in a Level 2 classification. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flows calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits resulting in a Level 2 classification. The fair values of the Bank's Federal Home Loan Bank advances are estimated using discounted cash flows based on the current borrowing rates for similar types of borrowing arrangements resulting in a Level 2 classification. The carrying amounts of accrued interest approximate fair value resulting in Level 2 or 3 classifications.

#### NOTE 15 - OTHER BENEFIT PLANS

The Corporation has a 401(k) benefit plan that covers all employees who meet certain eligibility requirements and choose to participate in the plan. The plan allows employee contributions up to the federal limits, which are matched 100% for the first 3% of compensation contributed and then 50% of the next 2% of compensation contributed beginning on the first day of the calendar quarter following the employee's one-year anniversary. The 401(k) benefit plan expense for 2022 and 2021 was \$337 and \$298, respectively.

# NOTE 16 - OTHER COMPREHENSIVE INCOME (LOSS)

The following is a summary of the accumulated other comprehensive income balances, net of tax:

	Balance at <u>12/31/2021</u>			Current Period <u>Change</u>	Balance at <u>12/31/2022</u>		
Unrealized gains (losses) on securities available for sale Unrealized gains (losses) on cash	\$	2,299	\$	(22,874)	\$	(20,575)	
flow hedge		46		3,017		3,063	
Total	<u>\$</u>	2,345	<u>\$</u>	(19,857)	<u>\$</u>	(17,512)	

(Dollars in thousands except share and per share amounts)

#### **NOTE 17 - EARNINGS PER SHARE**

Basic earnings per share available to common shareholders is computed by dividing net income adjusted for income allocated to participating securities by the weighted average number of common shares outstanding during the period. All outstanding unvested share-based payment awards that contain rights to non-forfeitable dividends are considered participating securities for this calculation. Diluted earnings per share available to common shareholders reflects the potential dilution that could occur if stock options to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity. The factors used in the earnings per share computation follows:

	<u>2022</u>	<u>2021</u>
Basic Net income Less: Undistributed income allocated to	\$ 16,726	\$ 14,541
participating securities	448	350
Net earnings allocated to common stock	<u>\$ 16,278</u>	<u>\$ 14,191</u>
Weighted common shares outstanding including participating securities Less: Participating securities	2,895,888 77,546	2,880,187 <u>69,356</u>
Weighted average shares	2,818,342	2,810,831
Basic earnings per share	<u>\$5.78</u>	<u>\$5.05</u>
Diluted earnings allocated to common stock	<u>\$ 16,278</u>	<u>\$ 14,191</u>
Weighted average shares Add: Dilutive effects of assumed exercises	2,818,342	2,810,831
of stock options and warrants	12,364	13,367
Average shares and dilutive potential common shares	2,830,706	2,824,198
Diluted earnings per share	<u>\$5.75</u>	<u>\$ 5.02</u>

At year-end 2022, there were 3,077 stock options that were not considered in computing diluted earnings per common share for 2022, because they were antidilutive. At year-end 2021, there were 5,000 stock options that were not considered in computing diluted earnings per common share for 2021, because they were antidilutive.
